DOCKET NO.: ORT 1448 Application No.: 09/875,456

Notice of Allowance Dated: September 27, 2004

Amendments to the Specification:

Please amend the specification as follows:

Please enter the following amended paragraph for the paragraph beginning "Figure 1 -" on page 30 after the <u>BRIEF DESCRIPTION OF THE DRAWING</u>.

Figure 1 - The amino acid sequence of human voltage gated sodium channel β1A subunit (SEQ ID NO:14) aligned with (A) the rat voltage gated sodium channel β1A subunit (SEQ ID NO:15) and (B) human voltage gated sodium channel β1 subunit (SEQ ID NO:16) are shown. The overall identity between human and rat VGSC β1A subunits is about 72%, while the identity of their carboxyl terminal regions is less than 33%. The overall identity of human VGSC β1A and β1 subunits is 75%, but the identity of their carboxyl terminal regions is less than 17%.
